ABOUT ME

System Administrator and former Cybersecurity Engineer with expertise in Linux-based technologies, networking, and security. I specialize in server management, virtualization solutions, and network implementation with a focus on maintaining secure and efficient IT infrastructures.

WORK EXPERIENCE

- | | |
|----------------|--|
| 2022 - Present | FORVIA HPC SYSTEM ADMINISTRATOR <ul style="list-style-type: none">• Maintained Windows and Linux servers ensuring system stability and performance• Integrated ActiveDirectory and SALT minions on Linux servers• Managed virtual servers with ManagelQ and network infrastructure with VitalQIP• Installed and configured PBS (Portable Batch System) on HPC server for effective job scheduling and resource allocation |
| 2022 - 2024 | DOLPHOST FOUNDER <ul style="list-style-type: none">• Developed secure WordPress websites with emphasis on security best practices• Provided maintenance and sales of VPS and web hosting services• Managed domain registrations and transfers• Implemented and configured hosting management solutions (WHMCS, cPanel) |
| 2020 - 2022 | ATOS IT SOLUTIONS CYBER SECURITY ENGINEER <ul style="list-style-type: none">• Conducted risk and vulnerability assessments using NESSUS, providing detailed reports to senior management• Implemented firewall rules on next-generation firewalls<ul style="list-style-type: none">◦ (CISCO, Fortinet, Palo Alto, Juniper)• Configured and managed proxy rules on McAfee and SQUID systems• Monitored data access and regulated file use using CyberArk• Migrated and created policy rules for Windows 10 end users using Forescout |
| 2018 - 2020 | NETEX ROMANIA SYSTEM ADMINISTRATOR <ul style="list-style-type: none">• Managed backup processes using BAREOS, ensuring data integrity and redundancy• Performed patching and troubleshooting on NetexOS (Debian-based) with Puppet automation• Installed XEN hypervisors and integrated Docker for development team• Migrated Puppet from bare metal infrastructure to Kubernetes (K8s) cluster• Managed VOIP system based on Asterisk and CISCO phones• Configured networks for routers using StrongSwan for IPsec site-to-site connections |

EDUCATION

2016 - Present **RELEVANT COURSEWORK**

Specialized training in networking (leading to **CCNA** certification), **Linux** system administration, **virtualization** technologies, containerization (**Docker**, **Kubernetes**).

2019 - 2020 **CISCO CERTIFIED NETWORK ASSOCIATE (CCNA- #NJXWKRF7D1EQ7C0)**

Prepared through a 7-month vocational training program covering 4 comprehensive modules, with extensive practical experience in both physical CISCO equipment and virtual network environments (GNS3) before certification.

PROJECTS

HOMELAB

- Built and maintained Dell PowerEdge R720 server
- Proxmox virtualization running **Linux** and **Windows** VMs
- Network security with VLANs, WAF, and pFSense firewall
- Deployed Docker environments managed with Portainer
- Implemented K3S Cluster with Rancher

WEB

- merox.dev/websites/

SKILLS

SYSTEMS

- Linux Administration
- Windows Server
- Virtualization
(Proxmox, Docker)

SECURITY & AUTOMATION

- Security Assessment
- Backup Solutions

NETWORKING

- CISCO Configuration
- Firewall Management
- VPN Implementation
